<b>Office Action Summary</b>	Application No. 10/617,654	Applicant(s) ISHII, SHOICHI	
	Examiner Leslie Wong	Art Unit 1761	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Applicant's election with traverse of Group I, Claims 18-42 on June 18, 2004 is acknowledged. The traversal is on the ground(s) that there is no burden on the Examiner. This is not found persuasive because Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nofre et al (U.S. Patent No. 5480668).

Nofre et al disclose sweeteners in which R1-R6 are all hydrogen atoms and one in which R3 is a hydroxy group and the remainder are hydrogen atoms (see entire

document). Nofre et al also disclose the combination of the sweeteners with other sweetening agents such as sugar and sugar alcohols (see column 6, lines 16-26).

The claims differ as to the use of specific functional groups.

In the absence of a showing of criticality, the substitution of functional groups with well-known functional groups for the purpose of enhancing flavor would be no more than a matter of choice to a person of skill in the art. It is also noted that mixing of sweeteners with other sweeteners is well-known to one of skill in the art.

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to substitute the functional groups of Nofre et al because the substitution of functional groups with other well-known functional groups is well-known and conventional in the art.

In the absence of unexpected results, it is not seen how the claimed invention differs from the teachings of the prior art. Applicant's claims are drawn to a combination of known components which produces expected results, see *In re Kerkhoven* 205 USPQ 1069 and *In re Gershon* 152 USPQ 602.

All of the claim limitations have been considered. None of them are seen as serving as basis for patentability.

No claim is allowed.
